

- a) receiving, by said data processing apparatus, information specific to a user and necessary for accessing an account of said user;
- b) verifying said account being valid, by an electronic transaction system, by use of said information received by said data processing apparatus;
- c) using by said data processing apparatus, a favourable result of said verification as a pre-condition for providing user access to at least a part of the functionality of said data processing apparatus;

wherein said steps a) to c) is being performed without charging said account and said at least a part of functionality being not related to said validity status of said account.

Pulu No.

- 21(Second Time Amended). A method for verifying identity of a user of a data processing apparatus, comprising the steps of:
- a) receiving, by said data processing apparatus, information specific to a user and necessary for accessing an account of said user;
- b) verifying said account being valid, by an electronic transaction system, by use of said information received by said data processing apparatus;
- c) using by said data processing apparatus, a favourable result of said verification as a pre-condition for providing user access to at least a part of the functionality of said data processing apparatus;

wherein said [access] steps a) to c) is being [provided] performed without charging said account and said at least a part of functionality being not related to said validity status of said account.
